**Subject:** RE: EOC APPROVED FOR POSTING - Region 9 surface water for August 12

I like the more detailed instructions for posting!

Just make sure to let us know what to call the Excel file itself (the filename) as you would like to appear on the Web page. And should we note if it's water or sediment, etc (in general—not for this post necessarily).

I know that Jeff is on it right now. I'm going to try to get lunch really quickly so that I can be ready to take over in about 30 minutes for any possible postings this evening.

Thanks, everyone!

**Subject:** EOC APPROVED FOR POSTING - Region 9 surface water for August 12

Please post the attached data with the language below:

One-liner for main data page:

Water quality samples collected on August 12, 2015 from the Animas River

More detailed description (to appear when you click on the link):

To assess the impacts of the release at the Gold King Mine, water quality samples were collected from the Northern Border of New Mexico to the Navajo Nation at numerous intervals beginning on Aug. 6, 2015.

Surface samples were taken prior to the plume's arrival to establish a baseline for water quality

comparisons. Each surface water sample was analyzed for 24 metals, including arsenic, cadmium, lead and mercury. Surface water samples were collected on Thursday, August 6, 2015, at two (2) locations prior to arrival of the plume along the Animas and San Juan Rivers in New Mexico.

On Wednesday, August 12, 2015, eleven (11) locations were sampled after arrival of the plume. Based upon the surface water sample results in New Mexico, surface water concentrations are trending toward pre-event conditions.

**Subject:** Region 9 surface water for August 12

The attached data file has been reviewed by the HQ EU and is now approved for coordination with regional PIO and final posting.

Kathie: Do you have some supplemental sample location information that you can provide for this data set that can be posted. Something similar to previous posting messaging.
